

Turning Casual Riders into Loyal Members

Cyclistic Bike-Share
JUNE 2025

Problem:

Too many riders choose **single or day passes** but do not upgrade to **annual memberships**.

This keeps Cyclistic's **income** less stable and limits **long-term growth**.

Solution:

Use ride data to understand how casual riders travel and design **simple offers** and **clear benefits** to help them switch to annual memberships. This will build **loyalty** and make **revenue** more predictable.

Analytical goals

WHY: Explain low conversion with clear rider data

HOW: Find patterns and build targeted offers

Analytical goals

WHY: Explain low conversion with clear rider data

HOW: Find patterns and build targeted offers

Rider Behavior by Day of Week

Casual riders ride longer on weekends. **Members** ride shorter trips more often.

Source: Cyclic trip data Q1 2019–2020, R analysis

Trip Volume by Day of Week

Members make **frequent short trips** during weekdays — proving **daily loyalty**. Casual riders ride **less often but longer** on weekends — a **clear chance to convert** them to **annual members**.

Recommendation & Next Steps

We should turn casual riders **into** annual members **to** secure **stable**, repeat revenue.

- ▶ Use trip data to target casual riders with personalized offers.
- ▶ Design weekend-specific promotions highlighting membership benefits.
- ▶ Communicate savings and convenience through **clear**, simple digital campaigns.

Thank You.
